

tions BY RADIO

OUR fighting forces throughout the world are linked to Command Headquarters in Washington by a vast network of military communication. Messages are necessarily sent in code -- for in them are the secrets of our future military operations. Our system of radio stations in the United States has been a reservoir which provided our Army and Navy with thousands of skilled specialists who now maintain our important lines of military radio communication. Meanwhile, the services are training thousands of additional men for radio duty on land, on the sea, and in the air. Today, radio is the nerve system of our military might. Crackling messages over the airways will carry the signal of the last great offensive and the first news of the final defeat of our enemies.

ON THE SEA

The Watch Below! Firemen report burner control readings.

In the operational radio control of a Naval Air Station.

Navy radio operators help to guard the sea lanes.

Some of the delicate radio equipment in a Navy radio room.

Radioman receiving message on U. S. Battleship.
